1 INTRODUCTION

This document describes the activities that JIRAM performed during the activity period JM0201 (PJ020), with particular attention to the comparison between expected achieved data, keeping track of the instrument configuration with the commanding file (SASF).

3 ACTIVITY DESCRIPTION

During the PJ020 pass, JIRAM performed coverage of the South Pole (see fig. 1 and fig.2), of the aurorae and the planet's limb. Note that there is a spectral observation corresponding to each observation taken with the imager. Moreover, observations of Jupiter's moon IO were also implemented (not reported in the figures). Details about imager/spectrometer coupling and more in general about the instrument and its performance can be found in Adriani et al. (2017), Noschese et al. (2019).

Due to an uncertainty in the actual pointing of JIRAM frame (which is affected by the position of the despinning mirror at the time of the observation), JIRAM team found that the precision of the reconstruction of the geometry of both IMG and SPE pixels should be revised by a value of no less than 0.1 degrees. We want to underline that this issue was only discovered during JM0131, when we started to do systematic limb observations near the Perijove (PJ) and we could compare the calculated planet limb, using the reconstructed kernels, with respect to the image we collected by our instrument.

Figure 1: Simulation with JSPT (JIRAM Software Planning Tool), coverage of the South Pole with filter M. The overlapping yellow strips represent the predicted FOVs.

Figure 2: Simulation with JSPT. Coverage of the South Pole with filter L, the magenta line represents the theoretical position of the main auroral oval.

4 RADIATION SEQUENCES

Radiation sequences were collected in locations of low particle flux in order to update the mapping of good pixel locations to be used in subsequent radiation data processing. Radiation sequences targeting observations of the radiation environment were performed in the middle magnetosphere, on approach to the North polar region, the inner magnetosphere, and the South polar region.

5 SCIENTIFIC GOALS

Below is a table that describes for each science block in the commanding file the relative operational mode and the scientific objectives. The files relating to the various science blocks are shown in the file “JIR_STATUS_EDR_2019148T154953_V01.CSV” in the INDEX directory.

JRM (sarf)	Operational Mode	Goals
