**Metis INSTRUMENT
for the
Solar Orbiter Mission**

**Test Report
Analysis of the Metis PFM detector images acquired in TVAC**

Principal Investigator:

Ester Antonucci
INAF – Astrophysical Observatory of Turin, Torino, Italy

and the METIS Consortium:

Astronomical Institute – Academy of Sciences of the Czech Republic
CNR - Institute for Photonics and Nanotechnology, Padova, Italy
INAF – IASF, IAPS, OAA, OACN, OACt, OAPa, OATo, OATs, Italy
Laboratoire d'Astrophysique de Marseille, France
Max-Planck-Institute für Sonnensystemforschung, Germany
Naval Research Laboratory, USA
Politecnico of Turin, Italy
Universities of Florence, Padua, Italy
University of Athens, Greece

1 Introduction

1.1 Scope of the document

This document presents Metis team analysis of scientific TM data produced during the Metis PFM TVAC. Checks that were correctly verified during the SFT/FFT sessions are not re-verified here. In contrast, our analysis is performed by investigating:

- The quality and the cosmetics of the detector images,
- The noise performances.
- The auxiliary scientific data contained in the scientific telemetry generated by the instrument during the test
