**Metis INSTRUMENT**  
for the  
**Solar Orbiter Mission**

**Test Report**  
**EM EMC Test Report**

**Principal Investigator:**

**Ester Antonucci**

INAF – Astrophysical Observatory of Turin, Torino, Italy

**and the METIS Consortium:**

Astronomical Institute – Academy of Sciences of the Czech Republic

CNR - Institute for Photonics and Nanotechnology, Padova, Italy

INAF – IASF, IAPS, OAA, OACN, OACt, OAPa, OATo, OATs, Italy

Laboratoire d'Astrophysique de Marseille, France

Max-Planck-Institute für Sonnensystemforschung, Germany

Naval Research Laboratory, USA

Politecnico of Turin, Italy

Universities of Florence, Padua, Italy

University of Athens, Greece

**prepared by** METIS Team

**Book captain:** G. Nicolini

**approved by** G. Naletto – Experiment Manager

**reference** METIS-OATO-RPT-012

**issue** 1

**revision** 0

**date of issue** 03-MAY-2016

# **1 Introduction**

## **1.1 Scope of the document**

This document reports and discusses the results of the conducted emissions and susceptibility test performed in December 2015 on METIS EM at the EMC laboratory of ESA ESTEC.

The issue 1 of this document serves the purpose of demonstrating that the METIS EM is suitable for integration onto the ETB/OTB at AirbusDS Stevenage. .

The next issue of this document will include completely and exhaustively the test report covering all the tests cases performed on the EM, i.e. conducted and radiated.
